THE FIVE-MINUTE RESET

# Iceland trip checklist: before you leave each day

Yesterday's plan is a starting point. Before heading out, check the route, the hours you will actually be outside, and the way home. Tick the useful items, print a clean copy, or keep your choices in this browser.

## Check this morning

- ☐ **Read the regional text forecast and official warnings**
  Match the affected area and validity period to your route, including the return journey.
- ☐ **Check road conditions, closures and travel notices**
  A forecast and a road-status report answer different questions. Follow restrictions and local instructions.
- ☐ **Check the useful daylight window**
  Leave room for stops and delays. A sunset time is not a promise of good visibility.
- ☐ **Choose the alternative before you need it**
  A shorter route, a town day or staying put can be a successful change of plan.

## Pack for the actual outing

- ☐ **Bring wind/rain protection and a warm layer**
- ☐ **Choose footwear for the ground and activity**
- ☐ **Charge the phone and save essential details offline**
  Keep accommodation details and the way back available without a data connection.
- ☐ **Carry water and enough food for the day**
- ☐ **Check vehicle, equipment and operator instructions**
  The checklist does not establish that a road or activity is suitable for you.

## Leave a workable plan

- ☐ **Agree a return time and a check-in arrangement**
- ☐ **Use the official travel-plan service where appropriate**
- ☐ **Set a point to recheck conditions or turn around**

DATE / AREA / NOTES
